

Put the Power of Neptune Web Edit™ to Work for Your Business.

Finally, an affordable, easy to use and intuitive web content management solution that quickly and seamlessly integrates into your web site and scales to meet your growth needs.

Seize Control of the Cost of Operating and Maintaining Your Company's Web Site

Neptune Web Edit™ is affordable, user-friendly Content Management Software (CMS) that enables employees who know your company's products and services best to keep your Web site up-to-date without programming or HTML skills.

It is as easy-to-use as any standard word-processing application and maintains the "look and feel" of your Web site by separating content management changes from the approved design.

This allows you to reduce the cost of operating and updating your Web site by eliminating the need for busy IT staff and high-priced consultants to make routine daily, monthly or quarterly content updates.

Fast, Seamless Installation and Integration

Neptune Web Edit™ CMS quickly and seamlessly integrates into an existing or new Web site as well as sites that deliver dynamic and personalized content. Because it is a browser-based system, you do not need to make any hosting changes or install additional software.

Ensuring Privacy and Security

User-Authorization requirements allow you to control authoring and publishing of content to ensure the security of your Web site. Before new information is posted to your site, your content administrator can review all updates and determine who has made which changes and when. Enhanced versions of Neptune Web Edit™ offers the ability to publish changes over a secure channel.

Effortlessly Update Content, Images and Page Templates

Neptune Web Edit's point-and-click editing makes updating content as intuitively easy as using any standard word-processing application. It allows authorized employees to insert, delete and edit links, images, files and page templates without the need for technical training.

Enhance Your Web Site's Value With Accurate, Up-to-Date Information

Neptune Web Edit™ allows you to efficiently control the accuracy and timeliness of content changes as well as automate and streamline repetitive production and publishing processes.

Without any programming or HTML skill, your employees will be able to:

- Contribute and maintain content for specified areas of expertise
- Quickly make updates and changes to your Web site 24 hours a day, 7 days a week from anywhere with Internet access
- Ensure date sensitive information is available only while relevant
- Improve consistency of content management, knowledge sharing and distribution of news for intranet and extranet Web sites
- Reduce your company's reliance on external consultants and professional service firms
- And more!

Scalable and Customizable To Meet Changing Workflow Needs

As your Web site changes and grows, Neptune Web Edit™ scales according to both administrative and functional organizational requirements. Add-on database driven modules are available to address specific functional needs and additional content administrators can be assigned to handle increased workflows.

Absolute Best Price in the Industry

Neptune Web Edit™ has a simple flat pricing structure that offers you the best pricing in the industry. There are no hidden costs for staff training, site redesigns or ongoing maintenance support fees. It also enables you to immediately reduce or eliminate the hard cost of outsourcing content management for your Web site.

Getting Started

How Neptune Web Edit™ works:

1. Editing Process: The Web page is edited within the browser using Neptune Web Edit™

2. Production Server: The Web page is saved to the Production Server where it can be passed on for approval or workflow processes.

3. Approval Process: Web pages can go through an approval chain with reviewers, editors and then approved for publishing.

4. Publishing Process: Web pages approved for publishing from the Production Server are uploaded to your live web site or Intranet via Neptune Web Edit™

System Requirements

Client Side

Neptune Web Edit™ requires no proprietary client side software. Neptune Web Edit™ runs entirely in the web browser of the user. For best performance, Neptune Web Edit™ users should use Microsoft Windows (95 and up) with Microsoft Internet Explorer (version 5 or higher). The WYSIWYG editor is not available to Netscape or Macintosh users.

Server Side

Performance is monitored and assured. All maintenance and software upgrades are free of charge. Neptune Web Edit™ works with your current web site, hosting provider and browser. There is no additional software to download, install or maintain. Neptune Web Edit™ can be deployed across your entire organization at a minimal cost and without the requirement of additional manpower or infrastructure.
